Google Workspace Backup & Recovery

Comprehensive Backup

An unlimited backup service for your Google Workspace data in Gmail, Drives, Calendars, Contacts, and Shared Drives.
Recover in Minutes, Not Days

Without having to pick up the phone, easily restore your Google Workspace content in or out of place in minutes with a seamless but comprehensive process.

Worry-free Backup

We run automatic backups up to four times a day and retain 100% of your data for one year. Unlimited backup subscriptions give you the flexibility you need, and the protection you want.

Backup on Your Terms

Choose to securely store your Google Workspace data in our scalable Azure Storage, your private cloud, or in a data center with vendor of your choice.

The Most Complete Cloud-To-Cloud Backup Solution

AvePoint Cloud Backup is the industry's most complete cloud-to-cloud backup solution for Google Workspace. With unlimited, automated backups, and secure storage in AvePoint's Azure storage or your own cloud, you just decide how much to recover, and when. On-demand and granular, item-level restore provides anytime access for your business-critical emails files, and other content in Gmail, Drives, Calendars, Contacts, and Shared Drives. Help connect your users with their lost data by self-service, automatic restore with ReCenter.

COMPREHENSIVE BACKUP

- Near-zero configuration for daily backup plans and target protection is up to 4 backups per day (or every 6 hours).

- Protection for Google Workspace content in Gmail, Drives, Calendars, Contacts, and Shared Drives.

- Built-in business rules and filters enable you to quickly choose which content you want to backup.

- Store backups in our scalable Azure Storage with minimal configuration, or in your cloud or data center of choice with support for Microsoft Azure, Amazon S3, Dropbox, and any data destination accessible via Secure File Transfer Protocol (SFTP), File Transfer Protocol (FTP) and any S3 compatible storage.

- Further safeguard your data from cyberattacks or leakage by bringing your own Microsoft Azure Key Vault Encryption Key to meet compliance regulations around sensitive data.

- Manage protection on a per user basis, by each service or both.

- Audit solution activity and always understand the status of your backups.

- Digest license and data consumption information in an instant.

- Always understand the status of your backup jobs, down to every object and folder protected.

- Find, select and delete users' with Drive, Gmail, Contact, Calendar backup data to meet "Right-to-be-Forgotten" rule under the EU GDPR Article 17.

GRANULAR RESTORE

- On-demand, granular recovery of Google Workspace content including Gmail, Drives, Calendars, Contacts, and Shared Drives- to the online or offline storage of your choice while maintaining all metadata and permissions.

- Granular restore doesn't just mean an individual document or version—perform security roll-backs to undo unintended permissions changes.

- Export and restore content outside of Google Workspace, including the ability to restore mail items to a PST, documents to a file share or device.

- Recover quickly with time- or object-based restores by locating business-critical files or emails with full-text search capability for rapid discovery.

- Monitor daily changes, detect unusual activity as well as potential ransomware attack events at an early stage, investigate the issue preemptively, and quickly restore from a good backup point with ease.

- ReCenter is a self-service, end user portal where users can easily locate and restore their lost content in personal Drives, Calendars, Contacts, and Mail without burdening IT.
