HPE STOREEVER MSL3040 SCALABLE LIBRARY EXPANSION MODULE (Q6Q63A)

Business Class Libraries

WHAT'S NEW

- HPE StoreEver MSL3040 Tape Library now supports up to 15 expansion modules, scaling up to a capacity of 28.8PB [2]
- HPE StoreEver MSL3040 Tape Library 48U spooling kit is now available. This enables existing MSL3040 customers to add additional expansion modules (see QuickSpecs for more details)

OVERVIEW

The enormous, data-driven potential of emerging technologies like 5G, AI, ML and IoT is creating a plethora of opportunities for businesses to transform their operations. The challenge is that though these opportunities abound, they are truly diverse and may require very different storage optimizations. The highly scalable HPE StoreEver MSL3040 Tape Library offers enormous storage density in a cyber-resilient, scalable and flexible form factor, which can start small but grow very big

indeed, all the while costing less to run and own than other archival storage alternatives. With its modular design and ability to upgrade and reuse HPE StoreEver MSL LTO upgrade drive kits, you can cost-effectively store up to 28.8PB of data. [1] The HPE StoreEver MSL3040 Tape Library offers exceptional enterprise features and functionality. It delivers a tape storage solution that addresses long-term data management challenges, while also providing an air-gapped solution against the threat of ransomware.

FEATURES

Highly Scalable for Greater Flexibility

Scale vertically from 40 to 640 cartridge slots to store up to 28.8 PB in a single 19-inch rack simply adding additional modules to boost performance and capacity without the need to invest in a whole new library.

Reduce cost and maximize ROI with better utilization of rack space – 600 TB per 1U.

Add between 1 and 48 LTO-9, LTO-8, LTO-7, or LTO-6 half-height SAS or Fibre Channel (FC) drives for blazing performance. Drives and expansions are easily installed and configured through fast and non-disruptive upgrades.

Get better answers more quickly. Gain competitive advantage in identifying customer needs, new product development, supply chain, and manufacturing by being able to store and analyze all your unstructured data on prem and under your control.

Cost Effective Tape Storage Solution

HPE StoreEver MSL3040 Tape Library offers 13 cartridge slots or 600 TB [3] of capacity per 1U of rack space, scaling from 40 to 640 slots with a single expandable library; there is no need to replace it as your requirements grow.

For investment protection, you can reuse LTO-6, LTO-7, LTO-8, or LTO-9 drives from an MSL 1/8 autoloader, HPE StoreEver MSL2024 or HPE StoreEver MSL6480 in the HPE StoreEver MSL3040 Tape Library. There are no additional license fees for installing new drives in an existing library.

Partitioning allows each partitioned library to be presented to the host as an independent library, separate from other partitions in the library.

Enterprise-class Manageability and Reliability

With HPE Command View for Tape Libraries (CVTL), HPE StoreEver MSL3040 Tape Library can be managed, configured, and monitored from any remote location via a browser-based interface.

HPE StoreEver MSL3040 Tape Library reduces human intervention and error by freeing up your resources with automated, consolidated, and simplified data protection and archive capabilities adding more to your bottom line.

HPEStoreEverTapeAssureSoftwareis a licensed feature ofHPECVTLwhichprovides predictive, analytical reporting of health and performance information for all drives and cartridges.Itcan also be used to track consumption metrics, enabling IT admins to make timely investments.

HPE Data Verification is a licensed feature of HPE CVTL that is supported with the HPE StoreEver MSL3040 Tape Library. Data Verification software proactively validates, scans, non-disruptively, the quality of data stored on LTO tape cartridges, which helps ensure the successful retrieval of data.

Easily manage your media both in or out of the library with a standard bar code reader and removable magazines.

Reduce Risk with Advanced Security Features and Reliability

HPE StoreEver MSL3040 Tape Library provides the ultimate last line of defense safeguard against the threat of ransomware as data stored on tape can be kept truly offline from the rest of the network behind an air gap.

Reduce the threat of cyberattack and other hostile incidents with the inexpensive HPE MSL Encryption Kit, a unique, self-contained encryption solution, which strengthens the innate air gap capabilities of a modern tape system without the need for dedicated software and appliances.

HPE Secure Manager License provides an additional level of security that lets you control access to the tape library by authorizing specific servers. It increases reliability by blocking disruptive traffic from unauthorized hosts to the library.

High availability path failover uses host drivers in conjunction with library and drive firmware to manage multiple paths across multiple SANs. It presents a single drive or robot path to applications and automatically transfer commands to an alternate path if the original one is lost.

Technical specifications**HPE StoreEver MSL3040 Scalable Library
Expansion Module**

Product Number	Q6Q63A
Drive type	LTO-9 Ultrium 45000 LTO-8 Ultrium 30750 LTO-7 Ultrium 15000 LTO-6 Ultrium 6250. Available with SAS and Fibre Channel interfaces
Capacity	Up to 28.8 PB, maximum assuming 640 slots with LTO-9 compressed 2.5:1
Host interface	8 Gb/s Fibre Channel 6 Gb/s SAS (LTO-6, LTO-7, LTO-8) 12 Gb/s SAS (LTO-9)
Transfer rate	Up to 72.45 TB/hr with 21 LTO-9 drives compressed 2.5:1
Number of cartridge slots	40 slots for the base module 40 slots per expansion module Scale from 40 to 640 slots in a fully expanded HPE StoreEver MSL3040 Tape Library
Encryption capability	AES 256-bit
Form factor	3U per module to a maximum of 21U
Product Dimensions (metric)	13.3 x 48.2 x 87.3 cm (HxWxD)
Weight	The weight of each library varies based on the type and number of LTO tape drives and LTO media contained in the configuration
Warranty	1-year parts, 1-year labor, 1-year onsite support coverage. For more warranty information refer to https://h20564.www2.hpe.com/hpsc/wc/public/home .

HPE POINTNEXT SERVICES

[HPE Pointnext Services](#) brings together technology and expertise to help you drive your business forward and prepare for whatever is next.

Operational Services from HPE Pointnext Services

[HPE Pointnext Tech Care](#) provides fast access to product-specific experts, an AI-driven digital experience, and general technical guidance to help enable constant innovation. We have reimagined IT support from the ground up to deliver faster answers and greater value. By continuously searching for better ways to do things—as opposed to just fixing things that break—HPE Pointnext Tech Care helps you focus on achieving your business goals.

[HPE Pointnext Complete Care](#) is a modular, edge-to-cloud IT environment service that provides a holistic approach to optimizing your entire IT environment, and achieving agreed upon IT outcomes and business goals through a personalized and customer-centric experience. All delivered by an assigned team of HPE Pointnext Services experts.

HPE Integration and Performance Services help you customize your experience at any stage of your product lifecycle with a menu of services based on individual needs, workloads, and technologies.

- Advise, design, and transform
- Deploy
- Integrate and migrate
- Operate and improve
- Financial Services
- GreenLake Management Services
- Retire and sanitize
- IT Training and personal development

Other related services

[HPE Education Services](#) delivers a comprehensive range of services to support your people as they expand their skills required for a digital transformation. Consult your HPE Sales Representative or Authorized Channel Partner of choice for any additional questions and support options.

Defective Media Retention is optional and allows you to retain Disk or eligible SSD/Flash Drives replaced by HPE due to malfunction.

HPE GREENLAKE

[HPE GreenLake](#) is HPE's market-leading IT as-a-Service offering that brings the cloud experience to apps and data everywhere – data centers, multi-clouds, and edges – with one unified operating model. HPE GreenLake delivers public cloud services and infrastructure for workloads on premises, fully managed in a pay per use model.
