

Spanning Backup for Microsoft 365

Exchange Email, Calendars, SharePoint Online, OneDrive for Business and Microsoft Teams are the applications your business relies on every day, especially with remote work on the rise. However, without a smart backup plan, lost data is gone forever or extremely time consuming to find and restore. Spanning Backup for Microsoft 365 makes it easy to recover lost emails, files, folders, chats and more in seconds.

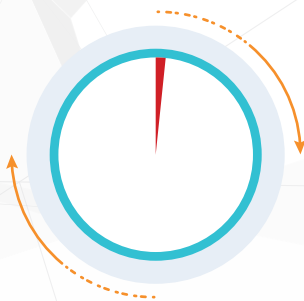

Why You Need Microsoft 365 Backup

Microsoft 365 is highly available and makes it easy for your distributed workforce to collaborate. However, just because Microsoft has copies of your data doesn't mean your data is accessible when and how you need it. Whether it's time spent by admins managing backups and recoveries, or downtime experienced by your organization in the event of a data loss incident, the common problem to solve is eliminating time loss.

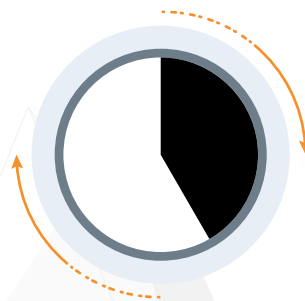

COMPARE RECOVER TIMES

IT Complete Solution

I'd been looking for a Microsoft 365 backup solution since making the move to the cloud. I chose this solution because I have Unitrends protection on-premises. I know that both Genova and I are now fully protected across all our applications.

— *Dave Cork - IT Analyst, Genova Technologies*

Unified BCDR

With our intuitive portal UniView, you can manage all your Unitrends backup environments, including backup appliances for servers and Microsoft 365 backups, from one screen. Got multiple locations, customers or tenants? Manage every location and backup through UniView, which includes two-factor authentication and BackupIQ for smart, custom alerting that gives IT admins only the notifications they need.

KEY FEATURES

Spanning Backup for Microsoft 365 saves you time and stress with:

Protection for Microsoft 365 Email, Calendars, SharePoint Online, OneDrive for Business and Microsoft Teams

Extend your Spanning Backup for Microsoft 365. No more panic when a user deletes an email or file.

Automated and on-demand backup

Your data is automatically backed up every day in the background and you can perform additional backups as needed at any time.

Easy setup

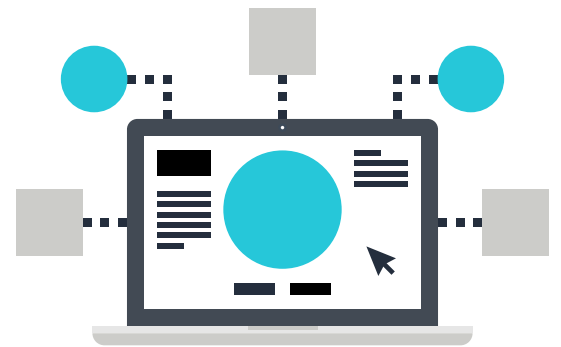

Nothing to install. Auto-discovery of mailboxes, SharePoint sites and OneDrive for Business accounts makes backing up a snap.

Complete status monitoring

Monitor and resolve backup errors and enjoy complete confidence in your backups with a detailed status history.

Self-service recovery in seconds

No more painful searching. Just quick, self-service restore through an intuitive user interface.

Unlimited retention

No caps on data retention. Priced simply per user, per year.

Industry-leading security

Spanning has successfully completed the SSAE 16 SOC2 audit process, a rigorous evaluation of operational and security controls.

Cross-user restore from one Microsoft 365 account to another

Enable administrators to quickly restore data from one user account into another.

Point-in-time backup and accurate, granular restore

Access historical snapshots or versions of all your data and restore to any previous version with 100% accuracy.

GET STARTED

Spanning Backup for Microsoft 365 provides automated backup and recovery that you can trust for email, calendars, SharePoint, OneDrive for Business, Microsoft Teams and more.
